(54) Title: DISPLAY APPARATUS FOR CHANGING IMAGES

(57) Abstract: The invention relates to a display apparatus for changing images. The apparatus comprises a cassette unit adapted for replacement as a single unit. The cassette unit comprises multiple sheet-formed image carriers (21, 22, 23, 24). The image carriers (21, 22, 23, 24) comprises image parts constituting at least two different images. The image carriers (21, 22, 23, 24) are subdivided into panels adapted for sliding between each other. The cassette unit further comprises a back plate (42) covering a side of one of the image carriers (21, 22, 23, 24). The display apparatus further comprises moving means (30) for moving the different image carriers (21, 22, 23, 24) relative to each other, and a frame (28) for supporting the cassette with the image carriers (21, 22, 23, 24) and the moving means. According to the invention, one of the image carriers (21, 22) is fixedly attached to the back plate (42) along its edges. The back plate (42) is movable relative to the frame (28), and the moving means (30) is adapted for moving the back plate (42).

\* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier document but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
